

Component	Program	Program Description
CSS - FSP	Full Service Partnership	Consumers of all ages (children 0-15, transition age youth 16-25, adults 26-59, and older adults 60+) who meet eligibility requirements are provided "whatever it takes" services. A full array of recovery-oriented mental healthcare, including psychiatric services, is provided to consumers enrolled in an FSP. Services and supports include funding for housing, food, clothing, primary healthcare, transportation, education, and vocational opportunities.
CSS - GSD	Crisis Access Continuum	Provides increased access and an introduction to mental health recovery concepts at the earliest opportunity for consumers experiencing challenges. Provides a local crisis hotline, a warm line, and outreach and engagement services for consumers who have recently been hospitalized or released from a crisis evaluation, and respite in a supported transitional housing setting.
CSS - GSD	Forensic Mental Health Partnership	Provides support for consumers who encounter legal problems or are incarcerated in jail or juvenile hall due to mental illness. Assists consumers in addressing their mental health needs, navigating the legal process, transition planning, and provides support in the community after release from incarceration through service coordination, clinical services, and the FSP program when indicated.
CSS - GSD	Housing Access	Provides resources and linkage to MHSA-subsidized housing for FSP consumers, one-time funding for those consumers at risk of losing their housing or needing assistance getting established in housing, and transitional housing for homeless consumers.
CSS - GSD	Older Adult Access	Provides outreach and engagement services, linkage to resources, mental health interventions, and FSP programming to seniors who may be experiencing mental health challenges. The Senior Peer Counseling program provides peer-aged volunteer support to older adults who may be isolating or experiencing mild mental health concerns.

CSS - GSD	Coordinated Care for Co-occurring Behavioral and Physical Health Conditions (Formerly Integrated Physical and Behavioral Health)	This expanding element in the recovery planning process is a critical component of comprehensive services and supports that has been identified as an obstacle to wellness for consumers experiencing behavioral health difficulties. The program is intended to provide coordinated resources and treatment options for consumers with complex co-occurring behavioral and physical health disorders.
CSS - GSD	Peer Support	Supports staffing to serve both transition age youth and adult consumers in the TAY and Adult Peer Support Centers. Programs provide access to services (including non-mental health related), peer support, socialization, and companionship to these two age groups. The concepts of wellness, recovery, and resiliency are imbedded in the programming in both locations.
CSS - GSD	Parent Partner Support	Supports families involved with community mental health. A Parent Partner with "lived experience" as a family member assists families with navigating the system, service coordination, group support, and, as an FSP team member, assists the family through the FSP process.
CSS - OE	Community Outreach and Engagement	Serving specifically the Tribal and Latino communities in the corresponding Peer Support Centers serving each population. Each culturally influenced program provides access to services (including non-mental health related), peer support, socialization, and companionship to these two communities. The concepts of wellness, recovery, and resiliency are imbedded in the programming in both locations.
PEI	Early Intervention Services	Lake County Behavioral Health provides the equivalent of one full-time mental health specialist to provide direct early intervention services and supports to those consumers and families who experience the first onset of a serious emotional disturbance or serious mental illness.
PEI	Early Student Support	Enhances the social and emotional development of young students (grades K-2) who are experiencing school adjustment difficulties such that they are served in an intensive services setting. Alternative personnel provide direct services to students under ongoing supervision and training by credentialed school psychologists in collaboration with Lake County Behavioral Health Department professional staff.
PEI	Peer Support Recovery Centers (Formerly Wellness and Recovery Centers)	The Bridge Peer Support Center, Harbor on Main Transition Age Youth Peer Support Center, Circle of Native Minds Center and La Voz de la Esperanza, serve niche populations, promote cultural competency through program design, and allow access to resources and linkage to needed services.

PEI	Older Adult Outreach and Prevention	The Friendly Visitor Program provides companionship to the vulnerable population of homebound older adults. The volunteers offer individualized companionship, support, and friendship on a regular basis to seniors who have limited access to outside activities. Reassuring phone calls and access to the MHSA-funded Senior Peer Counseling Program are also benefits of the program.
PEI	Postpartum Depression Screening and Support	Mother-Wise provides volunteers, in their role as Saathi, who offer mothers the companionship of a listening ear and a helping hand. They offer real support and solutions to mothers at a time when they need it the most through home visitation. Mother-Wise services are available for all pregnant women or new moms with babies under twelve months, regardless of income.
PEI	Moved to Peer Recovery Support Centers (Formerly TAY Peer Support)	Funding is provided for an outreach coordinator position at the MHSA-funded TAY Drop-In Center. The program is intended to reduce disparities in access to mental health services to this identified priority population (transition aged youth). This position provides project coordination, peer training for like-aged volunteers at the center, and expands the existing programming to include outreach and prevention activities for the TAY population.
PEI	Trauma Focused Co-Occurring Disorder Screening and Treatment (Formerly Community Screening and Treatment)	Serving clients in community collaboration for screening and treatment of trauma and co-occurring disorders.
PEI	Prevention Mini-Grants	Invites community-based providers and organized consumer and family groups to design prevention activities and submit a funding request to Lake County Behavioral Health. This mini-grant program issues funding of \$500 to \$2,500 for one-time events and projects.
PEI	Training, Technical Assistance, and Capacity Building	Lake County committed this resource to the California Mental Health Services Authority and the Superior Region Data Workgroup to identify outcome measures to be used across programs. This pilot project was facilitated by RAND corporation providing training to the County on results based accountability using the Getting to Outcomes © approach to program design, evaluation, and continuous quality improvement.
PEI	Statewide and Regional Projects	Lake County is contributing 7% of its PEI funds to support the continuation of the Statewide Projects: Suicide Prevention, Stigma and Discrimination Reduction, and the Student Mental Health Initiative. The County is also continuing to support the regional suicide prevention hotline by providing sustainability funding beginning in fiscal year 2015/16.

PEI	Regional Suicide Prevention	Funding to support the regional suicide prevention hotline and local suicide prevention task force formerly funded by the statewide projects initiative.
WET	Workforce Education and Training	Provides funding for workforce staffing support, training and staff development, mental health career pathways strategies, and financial incentives to address shortages in the public mental health workforce.
WET	Superior Region WET Collaborative	Lake County has been a contributing member of this 16-county partnership since 2008. The collaborative is focused on the development of career pathways in community mental health in conjunction with institutions of higher education in the region.
INN	Full Cycle Referral and Consumer Driven Care Coordination	This proposed two phase project will include the use of a web based call center and community resources clearinghouse to link consumers to needed resources. Phase one involves notification of when referrals are sent, received, and completed. The system will also allow consumers to grant access to personal health information to anybody in their circle of support by way of a secure electronic personal health record in Phase two.
CFTN	Capital Facilities	The Clearlake Clinic will be renovated to provide a more integrated experience that promotes wellness, recovery, and resiliency and increased access and engagement to underserved populations.
CFTN	Lake County Electronic Health Record Project	Addresses technological needs for secure, reliable, real-time access to client health record information where and when it is needed to support care. Includes the following components: implementation of Anasazi software, conversion to Microsoft SQL server, conversion of paper charts, purchasing additional hardware, and ongoing service/maintenance, as well as meeting Meaningful Use and Interoperability requirements.
CSS – Housing	Housing Program	The MHSA Housing Program provides funding for development, acquisition, construction and/or rehabilitation of permanent supportive housing for individuals and their families who have a mental illness and are homeless, or at risk of homelessness. (Plan Update in 2016)
